

The AI-Native Startup

45 Minute Workshop - Level: Beginners

**Digital products and SaaS companies
are now fairly easy to build entirely
with AI**

Full-Spectrum AI-Powered Workflow

- Ideation
- MVP building
- Website (frontend & backend)
- Go-To-Market strategy
- Advertising campaigns
- Customer communication
- Iteration
- Scaling

Chat GPT (chatgpt.com) + Manus (manus.ai)

Unlike standard chatbots that only answer questions, the Manus AI agent is built to deliver complete, autonomous work. Operating in an isolated virtual machine sandbox (Ubuntu environment) with full internet access and its own filesystem, it acts like a digital intern by independently creating and executing multi-step plans.

Phase 1:

D/Refine your business idea

- > **Ensure the idea is solid**
- > **Identify competitors** (use as example)
- > **SWOT analysis** (Strengths, Weaknesses, Opportunities, Threats)
- > **Refine ideation**

Phase 2:

Formulate prompt

- > Pick a suited AI Model

- > Start building

Foundation & open source Models

Open AI - **Chat GPT 6 -Astra**

Anthropic - **Claude 5.5 - Opus**

Google - **Gemini 3.8**

Meta - **Muse Spark 1.3**

Manus 1.6

XAI - **Grok 4.7**

Agentic Models

Pricing...

Prompt:

„Build me a company like Google: A search engine that indexes the world's information. But don't copy Google's business model. Find entirely new ways to monetize the information contained in the blue links“

Deploy 2 different AI models „Chat GPT“ & „Manus“ to compare the results

From information to intelligence.

Traditional search sends you somewhere. Signal understands the information behind the links, connects the dots and helps you decide what to do next.

Understand

Compress thousands of sources into a structured view of facts, entities, relationships and emerging signals.

Discover

Surface companies, people, opportunities and market movements that ordinary search leaves fragmented.

Act

Move from a question to a shortlist, report, lead, alert or workflow — without starting over in another tool.

A new economics of search.

Signal is designed around value created from information — not simply attention around a click.

Intelligence

Professional research subscriptions for teams that

Intent

With explicit user consent, transform high-intent searches

Transactions

Connect discovery to trusted providers, products and services

Intelligence

Professional research subscriptions for teams that need continuously updated market intelligence.

Intent

With explicit user consent, transform high-intent searches into qualified commercial opportunities and useful recommendations.

Transactions

Connect discovery to trusted providers, products and services — and participate in the resulting transaction.

Don't search for links. Search for what matters.

Signal is a prototype of what an AI-native search company could become.
